information on the peace negotiations lacked interest. The meeting was of some length, but the proceedings were of a routine nature. The forthcoming elections gained Epusiderable attention and the prospects of Republican success were discussed, the members of the cabinet generally expressing sanguine views as to the election of a Republican house. Some of the Republican Issues were commented upon. The forthcoming annual message of the President to Congress was considered and some features of the reports of the various departments outlined in a general way.

The President, however, has not yet made much progress in the actual framing of the message. There was some attention likewise paid to military matters, particularly some references to conditions in Cuba, though the discussion along this line was unimportant. It was significant, however, that the matter of the peace negotiations in Paris was not taken up.

where a isea is not the only place where a life line is of importance.

There is a life line for the sick, as well as for the drowning man. It is Dr. Pierce's Golden Medical Discovery. It is not a cure-all, but it is a scientific medicine that goes to the fountain head of a number of serious and fatal diseases. When a man gets seriously sick, he can generally be cured by the right course of treatment. The treatment that cures many obstinate chronic diseases consists of pure air, good food, rational exercise, and the use of a remedy that will strengthen the weak stomach, correct the impaired digestion, invigorate the liyer and promote the assimilation of the live-giving elements of the food. The "Golden Medical Discovery" accomplishes all these things.
